

AccuLytes™

AccuLytes™ is a premium quality supplement for accurate replacement of the full spectrum of electrolytes in performance horses. The AccuLytes' formula is based upon recent studies of electrolyte loss in equine sweat and reflects ongoing research into the benefits of improved dietary cation/anion balance and buffering capacity. In addition to electrolytes in salt and chelated forms, AccuLytes contains the amino acid glycine, for enhanced absorption of electrolytes, and direct-fed microbial cultures, to supply beneficial micro-organisms that occur naturally in the hind gut of healthy horses. AccuLytes' unique blend of mild flavors and dextrose makes for an electrolyte that most horses are happy to eat, even on the first day. AccuLytes is guaranteed to give satisfactory results or your money back.

Ingredients:

Dextrose, salt (NaCl), sodium citrate, glycine, magnesium amino acid chelate (aspartate), calcium amino acid chelate, calcium silicate, calcium carbonate, magnesium carbonate, silicon dioxide, monosodium phosphate, natural and artificial flavorings, Lactobacillus acidophilus, Lactobacillus plantarum, Enterococcus faecium, Bifidobacterium thermophilum and Bifidobacterium longum.

Feeding Instructions:

Enclosed scoop holds 1 ½ ounces.

Feed 3 ounces (2 scoops) daily during training and performance. Feed 1 ½ ounces (1 scoop) daily during moderate exercise. Increase feeding of large breeds proportionately according to body weight in excess of 1,000 pounds. Severely stressed horses may benefit from additional amounts. Do not mix with acidic food products in a dose syringe. Store in a cool, dry place away from children. Close container after each use.
